

Veille technologique – Menu Maker by Qwenta

Outil utilisé : Feedly

L'outil Feedly me permet de centraliser plusieurs flux RSS pour suivre les actualités du développement web et des technologies utilisées dans le projet Menu Maker.

The image shows two parts of the Feedly interface. The top part is a list of feeds, and the bottom part is a detailed view of the 'Today' section.

Feeds List:

AI

- Introducing AgentKit, new Evals, and RFT for agents**
300+ OpenAI / 3d
Today, we're releasing new tools to help developers go from prototype to production faster: AgentKit, expanded evals capabilities, and reinforcement fine-tuning for agents.
- Introducing apps in ChatGPT and the new Apps SDK**
~ OpenAI apps ChatGPT • 200+ OpenAI / 3d
We're introducing a new generation of apps you can chat with, right inside ChatGPT. Developers can start building them today with the new Apps SDK, available in preview.
- Codex is now generally available**
200+ OpenAI / 3d
OpenAI with powerful new features for developers: a Slack integration, Codex SDK, and admin tools like usage dashboards and workspace management—making Codex easier to use and manage at scale.
- Defining and evaluating political bias in LLMs**
OpenAI / 14h
Learn how OpenAI evaluates political bias in ChatGPT through new real-world testing methods that improve objectivity and reduce bias.
- AMD and OpenAI announce strategic partnership to deploy 6 gigawatts of AMD GPUs**
~ OpenAI partners with AMD for AI chips • 78 OpenAI / 3d
AMD and OpenAI have announced a multi-year partnership to deploy 6 gigawatts of AMD Instinct GPUs, beginning with 1 gigawatt in 2024, to power OpenAI's next-generation AI infrastructure and accelerate globa...

Axe 1 – Technologies du projet

Ce flux regroupe les sources liées aux technologies du projet : React, Redux Toolkit, Node.js, MongoDB, et JWT.

The screenshot displays a RSS feed reader interface. On the left is a sidebar with navigation options: Today, Follow Sources, Create AI Feed, Search, Read Later, and Recently Read. Below these are 'Feeds' and 'Boards' sections. The 'Feeds' section lists various sources with their respective article counts, including 'React Native Blog' which has 10 articles. The 'Boards' section includes 'Integrations & API'. The main content area shows the 'React Native Blog' feed, which has 3K followers and 5 articles per week. It features a 'Most popular' section with four articles, each with a React Native logo icon, a title, a date, and a brief description. The articles are: 'New Architecture is here' (100+ likes, 6 days old), 'React Native 0.77 - New Styling Features, Android's 16KB page support, Swift Template' (100+ likes, 6 days old), 'React Native 0.74 - Yoga 3.0, Bridgeless New Architecture, and more' (58 likes, 6 days old), and 'React Native 0.82 - A New Era' (10 likes, 10 days old). The feed also shows dates for other articles: Oct 8, 2025 and Oct 3, 2025.

Getting Creative With shape-outside

by Andy Clarke / 3d

Last time, I asked, "Why do so many long-form articles feel visually flat?" I explained that: "Images in long-form content can (and often should) do more than illustrate. They can shape how people navigat...

What Can We Actually Do With corner-shape?

by Daniel Schwarz / 27d

When I first started messing around with code, rounded corners required five background images or an image sprite likely created in Photoshop, so when border-radius came onto the scene, I rememb...

Composition in CSS

by Zell Liew / 31d

Tailwind and other utility libraries have been huge proponents of composition. But, to me, their version of composition has always carried a heavy sense of naïveté. I mean, utility composition is...
